ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: METHODS FOR THE PREPARATION OF LYSINE BY FERMENTATION OF CORYNEBACTERIUM GLUTAM-
ICUM

(57) Abstract: The present invention features methods of increasing the production of a fine chemical, e.g., lysine from a microor-
ganism, e.g., *Corynebacterium* by way of deregulating an enzyme encoding gene, i.e., fructose-1,6-bisphosphatase. In a preferred
embodiment, the invention provides methods of increasing the production of lysine in *Corynebacterium glutamicum* by way of in-
creasing the expression of fructose-1,6-bisphosphatase activity. The invention also provides a novel process for the production of
lysine by way of regulating carbon flux towards oxaloacetate (OAA). In a preferred embodiment, the invention provides methods
for the production of lysine by way of utilizing fructose or sucrose as a carbon source.
